AMENDMENTS TO THE SPECIFICATION

Please replace the original specification with the substitute specification filed concurrently with this Response. The substitute specification includes no new matter. Both a marked-up copy and a clean copy of the substitute specification are provided.

In the substitute specification, paragraph numbers have been added. In addition, Applicant has added “(also referred to as ‘shift member 96’)” to paragraph 0034 to indicate that the shift arm 96 may also be referred to as shift member 96. This amendment is fully supported by the originally-filed application. For example, original claims 23-26 recite a shift member. The phrase “(also referred to as ‘reel unit 72’)” has been added to paragraph 0031 to indicate that the rope reel unit 72 may also be referred to as reel unit 72. This amendment is fully supported by the originally-filed application. For example, “reel unit 72” is used throughout the originally-filed specification to refer to the rope reel unit 72, including in paragraph 0031 of Applicant’s originally-filed specification.
